DECLARATION OF GEORGE COZENS IN SUPPORT OF DEFENDANTS'
OPPOSITION TO MOTION TO REASSIGN CASE

George Cozens declares as follows:

1. My name is George Cozens, I am over the age of twenty-one and I have personal, first-hand knowledge of the matters stated herein, and, if called upon to do so, I could and would competently testify thereto.

2. I am the Vice President of Engineering and Technology of Cox Communications Hampton Roads LLC ("CCHR"). I have been employed by CCHR and other Cox companies in Virginia for 12 years. I was formerly a Vice President of Cox Virginia Telcom, Inc. I was formerly the Director of Wholesale Markets for Cox Fibernet Virginia, Inc. I am familiar with CCHR's operations, as well as the operations of Cox Fibernet Virginia, Inc.

3. CCHR's headquarters are located at 1341 Crossways Boulevard, Suite 1168, Chesapeake, Virginia. CCHR has approximately 1,800 employees located in the Norfolk/Hampton Roads area.

4. Headquarters for Cox Virginia are located at 4585 Village Avenue, Norfolk, Virginia.

5. The majority of CoxCom's telephone customers in Virginia are located in the Norfolk area. For example, we have approximately 294,000 access lines in the Hampton Roads area, compared with approximately 12,000 access lines in the Roanoke area and approximately 80,000 access lines in Northern Virginia. An access line is a telephone line; although a household or single customer may have multiple access lines, generally we use the number of access lines as a proxy for the number of customers we have.

6. Because of the high concentration and penetration of the Norfolk market with CoxCom's Digital Telephone services, CCHR performs the residential back office support and operations for Northern Virginia, Roanoke, and the Hampton Roads/Norfolk locations for telephony services. CCHR is the location of our "ROC" or Regional Operations Center. This center controls back office support functions for CoxCom's Digital Telephone operations in Virginia, including providing 911 support, providing directory services, assigning and moving telephone numbers, as well as providing various reporting and billing documentation functions. The ROC supports not only the operations of CCHR, but also the CoxCom Digital Telephone services operated in Roanoke and the Northern Virginia areas by CoxCom NOVA and CoxCom Roanoke.

7. Because so much of the support for CoxCom's Digital Telephone services are provided through CCHR's ROC, there are a number of CCHR employees, in addition to myself,

who are involved in delivery of those services. The following summarizes the managerial level employees and their general responsibilities:

Name	Title
Frank Holman	Vice President of Business Operations for Hampton Roads
Clark Armentrout	Director of Financial Planning and Analysis for Hampton Roads
Chuck McDowell	Director of Master Telecommunications Center
Mary Clarke	Director of the Regional Operating Center in Hampton Roads
Antoinette Griffin	Operations and Support Manager for NOVA, Roanoke, and Hampton Roads
Kim Howell	National Director of the Regional Operating Centers (resides in Hampton Roads and maintains an office in Norfolk and Atlanta)

All of these individuals live and work in the Norfolk/Hampton Roads area and have their offices in Hampton Roads/Norfolk. To the extent documentation about the functions the personnel are involved with are relevant to this case, those documents reside in Hampton Roads.

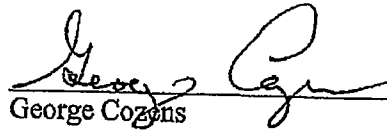

8. CoxCom's Digital Telephone Services in Virginia use a circuit-switched telephone network for the vast majority of subscribers. A smaller percentage (approximately 11%) of the Virginia subscribers are on a packet-switched telephone network. In both instances, Cox Digital Telephone services do not use the public Internet, but instead use a private transport network.

9. To gain approval to offer telephone services (including Cox Digital Telephone) in Virginia, CoxCom was required to obtain approval from the State Corporation Commission ("SCC"). This approval is not required for certain competitors (such as Vonage) that are not recognized as phone carriers and therefore are not regulated in the same manner.

10. CoxCom deployed Digital Telephone services in Hampton Roads in 1997. Later, CoxCom deployed Digital Telephone services to the Northern Virginia area.

I declare under penalty of perjury that the foregoing is true and correct.

Executed in Norfolk, Virginia this 28th day of January, 2008.

A handwritten signature in dark ink, appearing to read "George Cozens", written over a horizontal line.

George Cozens
Vice President of Engineering and
Technology, Hampton Roads Operations,
Cox Communications Hampton
Roads
